HIGHLIGHTS

- High frequency, double conversion online technology
- Ultimate Scalability and Expandability
- 19" Cabinets available in full and half height format
- Modular design capable of housing either 5x, 8x, 10x, 13x or 16x power modules.
- Power modules available in 10, 20, 40 and 50kVA ratings.
- Configurable N+N modular redundancy
- Parallel up to 4 cabinets together.
- Wide input voltage range
- Short circuit and overload protection
- Automatic fan speed control with load variation
- Emergency Power Off facility
- Smart RS232 and USB comms with monitoring software
- Optional relay or SNMP communications card
- Large Touchscreen LCD Interface

The Dale E600 UPS range is a modular UPS system suitable for Datacenters and other high density computer and IT Critical load applications.

The E600 UPS allows your power requirements to grow along with the demands of the business without the need to oversize the UPS at day one - reducing the initial cost of investment and reducing the total cost of ownership.

As your power demands increase, the E600 can expand its power capability to maintain the highest levels of power protection and availability.

The newly-designed inverter is one of the best energy conversion systems on the market, with up to unity output power factor and 95% operating efficiency in ON LINE Mode.

HIGH PERFORMANCE

- The advanced technology within the E600 UPS systems allows for the use full rated power even with unity power factor loads (kVA=kW) without any power derating even when operating at temperatures up to 40 °C
- Low input harmonic pollution with near unity input power factor and an extremely wide input voltage operating range (208-470Vac) requiring only minimum upstream power source rating and subsequent reduced investment costs.

HIGH QUALITY OUTPUT VOLTAGE

- Even with non-linear loads (IT loads with a crest factor of up to 3:1);
- High short circuit current on bypass;
- Filtered, stabilised and reliable voltage (ON LINE double conversion technology (VFI compliant with EN62040-3) with filters for the suppression of atmospheric disturbances;
- Power factor correction: UPS input power factor close to 1 and sinusoidal current uptake.

SOFTWARE

UPS MONITORING SUITE

COMMUNICATION ACCESSORIES

E-SNMP/4 - SNMP card for network monitoring of UPS

E-RELAY/2 - Volt-free card for status monitoring of UPS

SCALABILITY

The E600 range offers a comprehensive, easy to integrate, power protection solution for any critical IT applications, The end user can easily increase power or redundancy levels by adding additional power modules.

Six different cabinet sizes are available to build the system, which can accommodate either 10kVA, 20kVA, 40kVA or 50kVA Modules.

The available UPS power and redundancy can expand vertically from:

- 10 to 50kVA in one single power cabinet (E633100/20 with E63310H PM)
- 20 to 100kVA in one single power cabinet (E633100/20 with E63320U PM)
- 20 to 200kVA in one single power cabinet (E633200/20 with E63320U PM)
- 40 to 200kVA in one single power cabinet (E633200/4050 with E63340U PM)
- 40 to 400kVA in one single power cabinet (E633400/4050 with E63340U PM)
- 50 to 600kVA in one single power cabinet (E633600/4050 with E63350U PM)
- 50 to 800kVA in one single power cabinet (E633800/4050 with E63350U PM)

Further Expandable with up to 4 cabinets connected in parallel.

POWER SOLUTIONS

Looking for something more bespoke?

With our own purpose-built, manufacturing facility, we're a one-stop shop for our customers providing design consultancy, manufacture and ongoing maintenance for our products.

What we do

- An end-to-end service - design, manufacture, install, commissioning and servicing
- Experts in customised UPS solutions
- In-house mechanical and electrical design capability
- Solutions for any environment, application and location
- Industry-specific solutions including WIMES specified and PADS Approved UPS
- In-house project management team to manage the development and delivery of your product for exactly when you need it.
